SUMMARY

Computer Science undergraduate at VIT Vellore with two software development internships building production automation tools. Strong in C++ DSA (200+ problems) with full-stack project experience. Seeking SDE roles.

TECHNICAL SKILLS

Languages: C++(Main), JavaScript, SQL, Java

Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS

Backend: Next.js API Routes, REST APIs, JWT Authentication

Databases: Oracle SQL, MongoDB

Tools: Git, GitHub, VS Code, Vercel

CS Fundamentals: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Computer Networks

EDUCATION

Vellore Institute of Technology, Vellore

B. Tech in Computer Science and Engineering | CGPA: 8.16 / 10.0

Aug. 2023 – Present

Vellore, Tamil Nadu

Vidya Bharati Chinmaya Vidyalaya

Class XII – CBSE: 80.0%

April 2021 – March 2023

Jamshedpur, Jharkhand

Gulmohur High School

Class X – ICSE: 81.5%

April 2008 – March 2021

Jamshedpur, Jharkhand

EXPERIENCE

Timken India Limited

Software Developer Intern

May 2025 – Jun 2025

Jamshedpur, Jharkhand

- Engineered a Network Device Management System using VB.NET & Oracle SQL, centralizing IT asset tracking for **200+ network devices** across multiple company locations.
- Designed and built master data entry forms (Company, Location, Asset Type) that **reduced manual data entry time by approximately 35%** by standardizing and automating asset registration workflows.
- Implemented real-time device monitoring with automated email alerts, **reducing downtime detection time from 15+ minutes to under 1 minute** for critical network infrastructure.

Tata Cummins Private Limited

Software Developer Intern

Dec 2024 – Jan 2025

Jamshedpur, Jharkhand

- Developed end-to-end quality inspection automation software using VB.NET & Oracle SQL, replacing manual processes across the production line and **reducing human error while improving inspection throughput**.
- Integrated camera-based verification and QR code generation, improving traceability and **cutting manual verification steps by approximately 50%**.
- Built data access module enabling engineers to retrieve and audit **past inspection records** for defect analysis and compliance reporting.

PROJECTS

InterviewAI – AI Voice Interview Simulator | *Next.js, Gemini API, Web Speech API, Tailwind CSS*

[Live](#) [GitHub](#)

- Built a **voice-based AI interview simulator** with hold-to-speak input, live speech-to-text, and spoken AI feedback across **6 technical roles** (SDE, Frontend, PM, DevOps, Data Analyst, System Design).
- Integrated **Google Gemini API** with auto model discovery and retry logic for real-time answer evaluation, scoring, and a comprehensive performance summary.
- Engineered **retry-with-backoff and model-fallback** logic to handle Gemini API rate limits mid-interview, ensuring sessions continue without dropping a response.

Placement Tracker System | *Next.js, MongoDB, JWT, Tailwind CSS, Vercel*

[Live](#) [GitHub](#)

- Developed a **multi-role placement platform** with company listings, application tracking, deadlines, and real-time stats dashboards for students and admins.
- Designed **RESTful APIs** with MongoDB Atlas and JWT cookie-based auth; built responsive role-specific UI; deployed on Vercel.
- Handled **token expiry and refresh** via httpOnly cookies, preventing abrupt session drops and unnecessary re-logins during active dashboard use.

ACHIEVEMENTS

- Secured **3rd Place – IEEE SENSE-A-Thon (Hack-A-Thon) 2026**: Built a real-time Vehicle Health Monitoring System with multi-sensor integration, competing against 50+ engineering college teams. [Certificate](#)
- Solved **200+ DSA problems** across LeetCode and GeeksforGeeks, covering Arrays, Graphs, Dynamic Programming, and Trees.
